I would like to tell the FCC that XM Radio has really changed the amount of time I listen to the radio. I travel alot and have XM radio in my car and also the Boom Box. Not having to fight while traveling to find a radio station that I can pick up or carrying books on tape has been such a relief to me that I find find that I listen to my XM radio. I think that as long as I am willing to pay for the service and pleasure of listening to XM Radio I such be able to listen to what I what to hear on the radio. The quality of the sound is so much better. I also enjoy not having to listen to all the commericals in city were I do not live that mean nothing to me. I urge everyone that I know to buy satellite radio, because I feel that it is such a good value.Sincerely, Gwen Best
